

# RIGHT-WAY

## Risk Management

### Capabilities & Services

#### The Company

Right-way is a company that provides risk management services. Our team of multi-disciplinary experts is experienced and committed to providing quality service and achieving excellence.

#### Our Priorities

Right-way has five basic priorities:

- Focus on clients needs
- Work in partnership with our clients
- Use skilled and experienced consultants
- Communicate openly and frequently
- Provide cost effective and practical solutions

#### Our Services

Right-way provides comprehensive risk management services.

##### Management Systems

We assist clients to develop and implement appropriate management systems that address public liability, health, safety and environmental risks and assistance in the reduction of insurance costs. We develop integrated solutions that reflect the needs of our clients.

##### Risk Management Information Systems

We provide customised Windows based software applications that deliver a total solution for client's risk and injury management information needs. The applications provide an integrated systems based approach to building quality management systems that are cost effective, adding value and enabling the client to be more competitive and assisting the client to comply with legislative requirements.

##### Training Services

Right-way Trainers are industry experienced and accredited by WorkCover. We have successfully conducted a range of OHS courses across a wide range of industries. The range of courses currently conducted is attached.

#### Why choose us?

The Right-way team members have worked with a large number of private and public sector organisations, helping them successfully develop and implement agreed management strategies.
